

Paramount Energy allows homeowners to go solar without any upfront cost. In addition, you will pay the same or slightly lower payments for your solar electricity as you currently pay your utility company today – so you can switch to clean solar power for no extra cost. **And when you do Paramount Energy will donate \$400 to United Cerebral Palsy!**

Go Solar for \$0 Down - Save on Electricity Costs from Day One

With a SolarLease, you pay as you go, instead of all at once. The combination of your low monthly lease payment and lower electricity bill is the same or slightly less than what you pay the utility company today. You can start saving money from the very first day!

Typical System Cost (for a 5.0 kW system)

Without Solar:

Average Old Electric Bill \$260

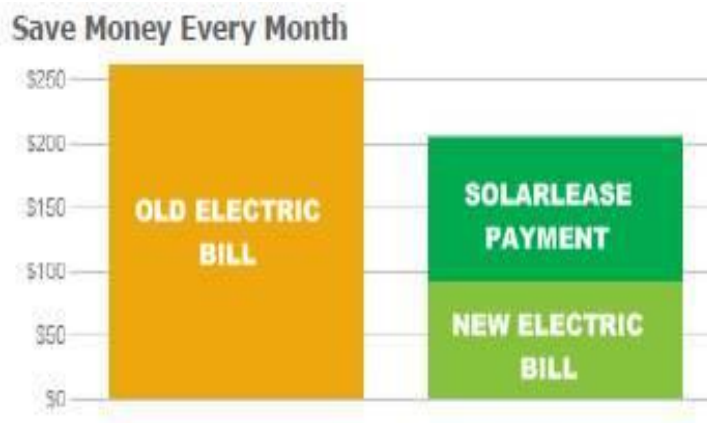

With SolarLease:

New Monthly Electric Bill \$ 90

Monthly SolarLease Payment \$115

New Average Cost for Electricity \$205

Net Monthly Savings \$ 55

Savings Grow Every Year

Your savings can grow over time as utility rates continue to increase. With SolarLease you are locking in today’s low cost of electricity. No matter how much utility rates continue to increase your solar electricity rate will be predictable for the long run.

Includes Free Monitoring, Maintenance, and Repair Service

SolarLease includes SolarGuard® proactive monitoring for the full life of the lease. SolarGuard allows you and our customer service team to continuously monitor your system to ensure it is running smoothly and performing as expected.

Help Spread the Word

We want to help everyone realize the benefit of going solar and to reward your efforts we’ll send UCP a check for \$400 for every person you send our way who ends up getting connected with Solar! If you would like a simple e-mail template to forward to friends, family or co-workers please send me an email and I’ll prepare one just for you!
